1. INTRODUCTION

Pocket Buddy is a platform that helps users find and redeem restaurant offers easily. It also helps restaurant owners manage and promote their deals. The app connects both sides, making it easier for users to save money and for restaurants to attract more customers.

1.1. EXISTING SYSTEM

- Right now, restaurant deals and promotions are spread out across many different platforms. Some restaurants post offer on their social media pages, others put them on their websites, and some use food delivery apps like Swiggy or Zomato. A few might even send deals through emails or text messages.
- At the same time, restaurant owners struggle to reach the right customers. Without a centralized platform focused just on restaurant offers, it's difficult for them to promote deals effectively and get noticed.

1.2. NEED FOR THE NEW SYSTEM

Pocket Buddy aims to provide a centralized platform where restaurant owners can manage offers, and users can easily discover and redeem them.

1.3. OBJECTIVE OF THE NEW SYSTEM

- Provide a seamless platform for restaurant owners to share and manage their Offers.
- Allow users to easily search and discover the best offers in one place.

1.4. PROBLEM DEFINITION

There's no single place where people can find all the restaurant deals, which makes things messy for both customers and restaurant owners. **Pocket Buddy** fixes this by offering a clear and easy-to-use platform that brings everything together.

1.5. CORE COMPONENTS

- Role-based access (Admin, Restaurant Owner, Regular User)
- Offer management system
- Search and filtering options
- User can claim offers

1.6. PROJECT PROFILE

Project Title	Pocket Buddy
Duration	3 months
Front End	ReactJS (with Vite)
Framework	ExpressJS
Backend	NodeJS
Database	MongoDB
Operating System	Windows 11
Users	Restaurants, Cafes, Hotels, Customer

1.7. ASSUMPTIONS AND CONSTRAINTS

- Users must have an active internet connection to use the platform.
- Content moderation is essential to ensure quality and compliance.
- The system should be designed to scale efficiently with increasing numbers of users and offers.

1.8. ADVANTAGES AND LIMITATIONS OF THE PROPOSED SYSTEM

Advantages:

- All restaurant offers in one place.
- Easy to use for both users and restaurant owners.
- Mobile-friendly and responsive design.
- Secure login with role-based access.
- Built-in subscription and payment support.

Limitations:

- Needs regular moderation to keep content clean.
- It depends on users and restaurants being active.
- Works only with internet connection.
- Some features are planned but are not available yet

2. REQUIREMENT DETERMINATION & ANALYSIS

2.1. REQUIREMENT DETERMINATION

The core requirements of the Pocket Buddy system include:

- **User Authentication & Role Management:**
Secure login system with roles like Admin, Restaurant Owner, and Customer.
- **Offer Management:**
Restaurants can create, update, and delete promotional offers.
- **Search & Filter Features:**
Users can easily discover offers using search and category filters.
- **Offer Redemption System:**
Users can request for redeem offers; restaurant owners can approve or decline.
- **Subscription Handling:**
Integration with payment gateway (Razorpay) for subscription plans.

2.2. TARGETED USERS

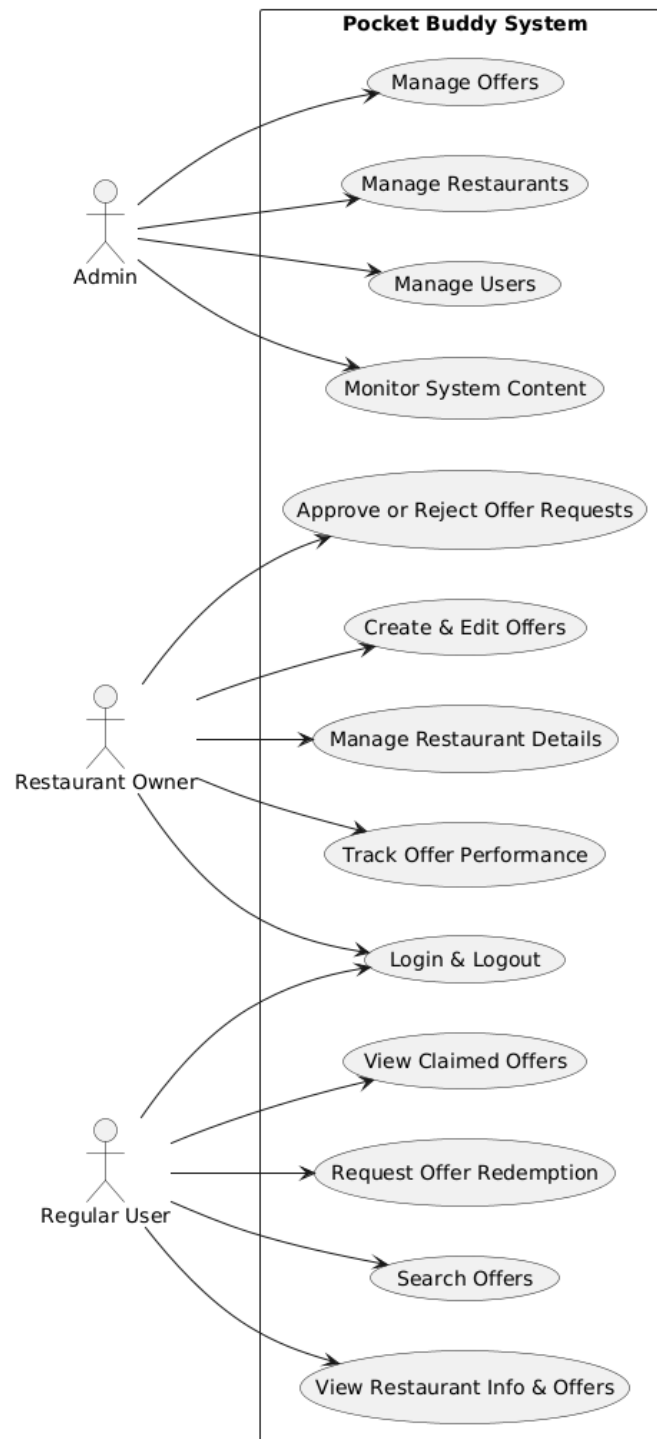

Pocket Buddy is designed to serve the following user groups:

- **Restaurants, Cafes, and Hotels:**
To promote and manage their offers.
- **Regular Users (Customers):**
To browse and redeem available offers.
- **Admins:**
To monitor the platform, manage users, and ensure content quality.

3. SYSTEM DESIGN

3.1. USE CASE DIAGRAM

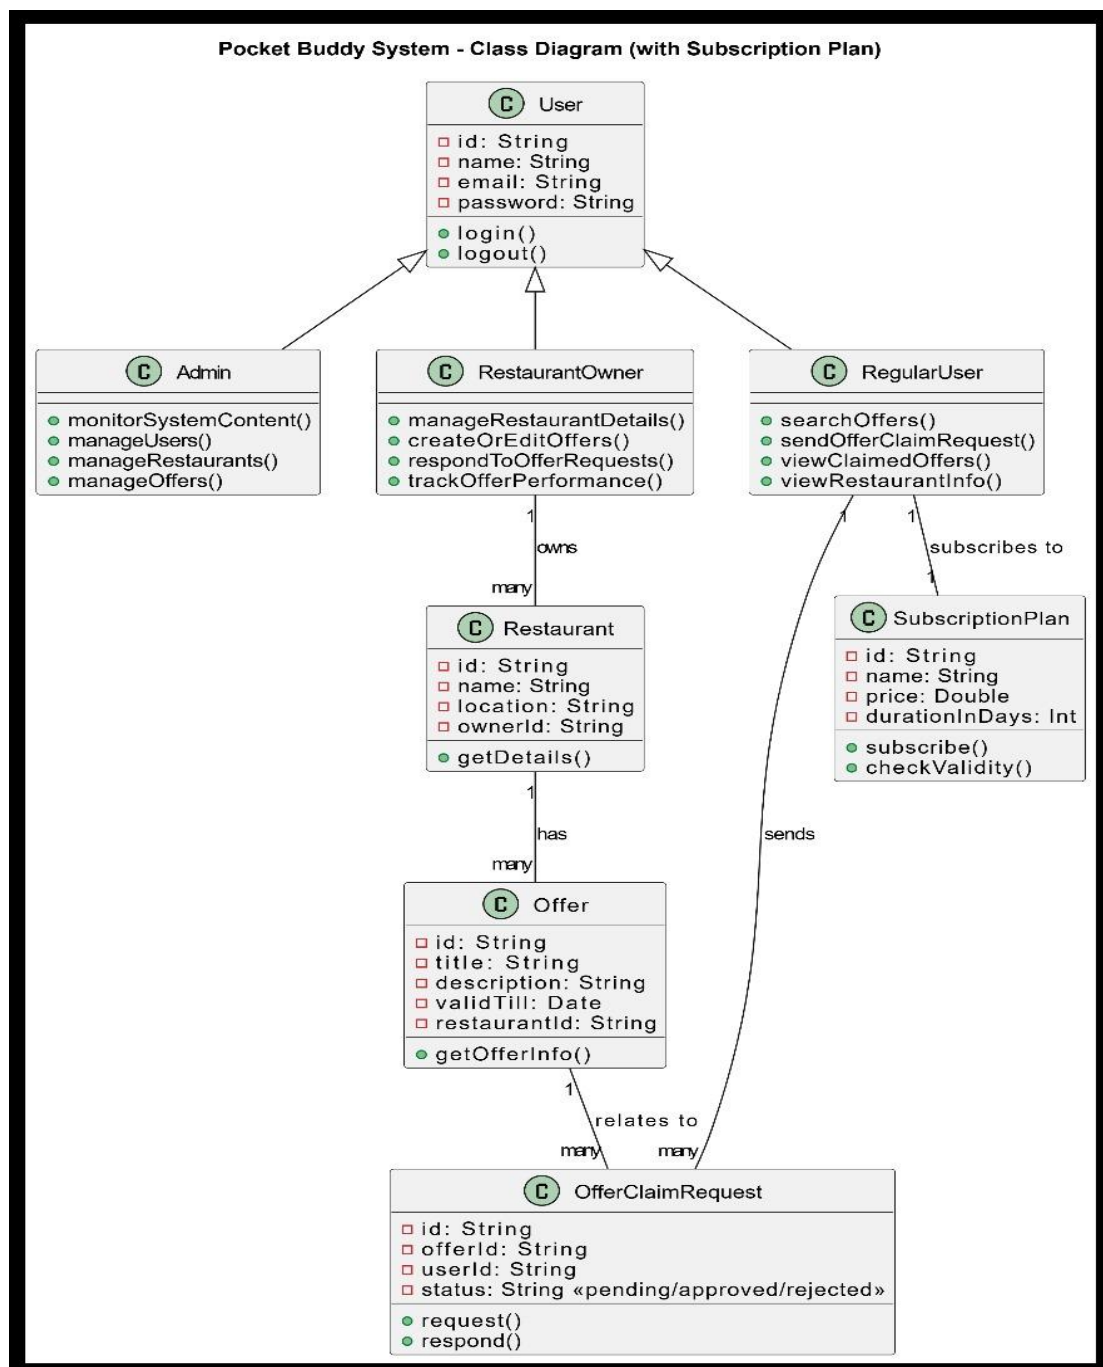

The use case diagram illustrates the interactions between different user roles and the system. It defines how Admins, Restaurant Owners and Regular Users interact with Pocket Buddy.

3.2. CLASS DIAGRAM

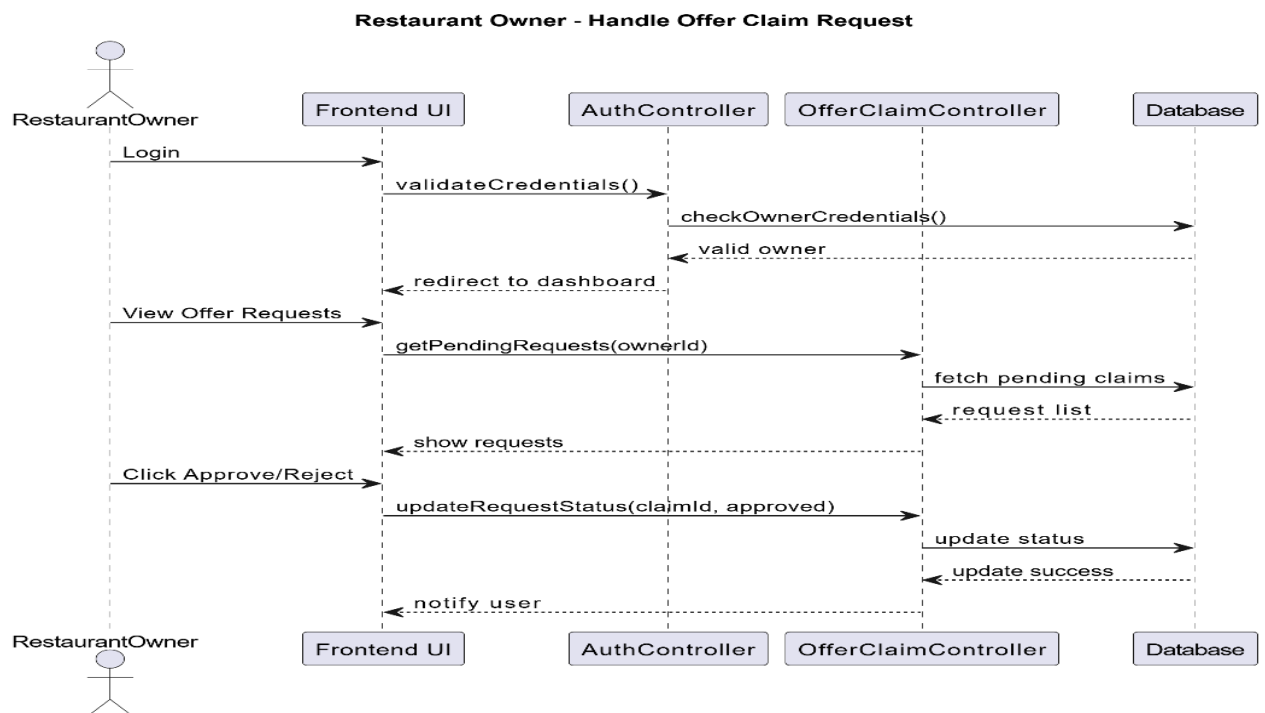

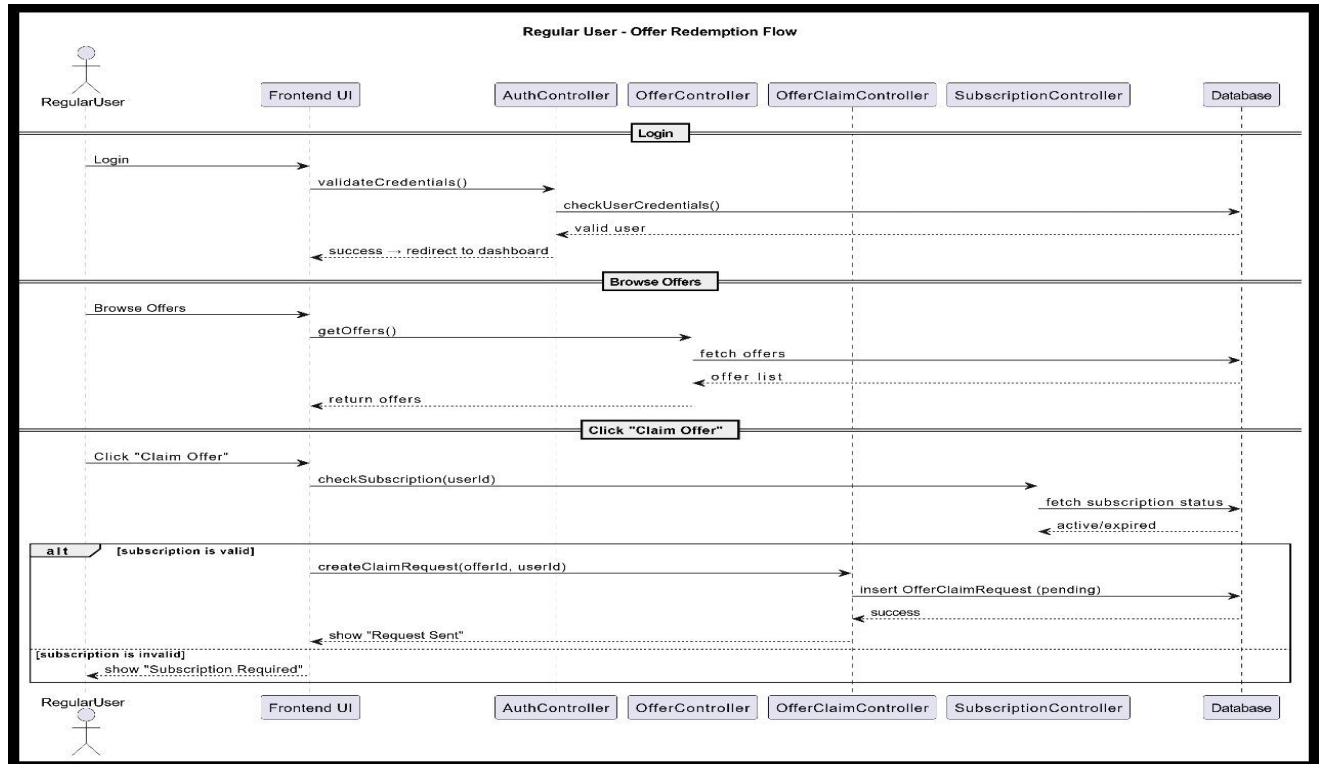

NOTE: This class diagram and database schema are included to fulfill academic documentation requirements. However, the actual project is built using the MERN stack (MongoDB, Express.js, React, Node.js), which follows a schema-less, document-based structure in MongoDB. Therefore, these diagrams are conceptual representations and may not fully reflect the dynamic and flexible nature of the implemented system.

The class diagram represents the data structure of the application, including key entities such as Users, Restaurants, Offers, Reviews, and Subscription plan, along with their relationships.

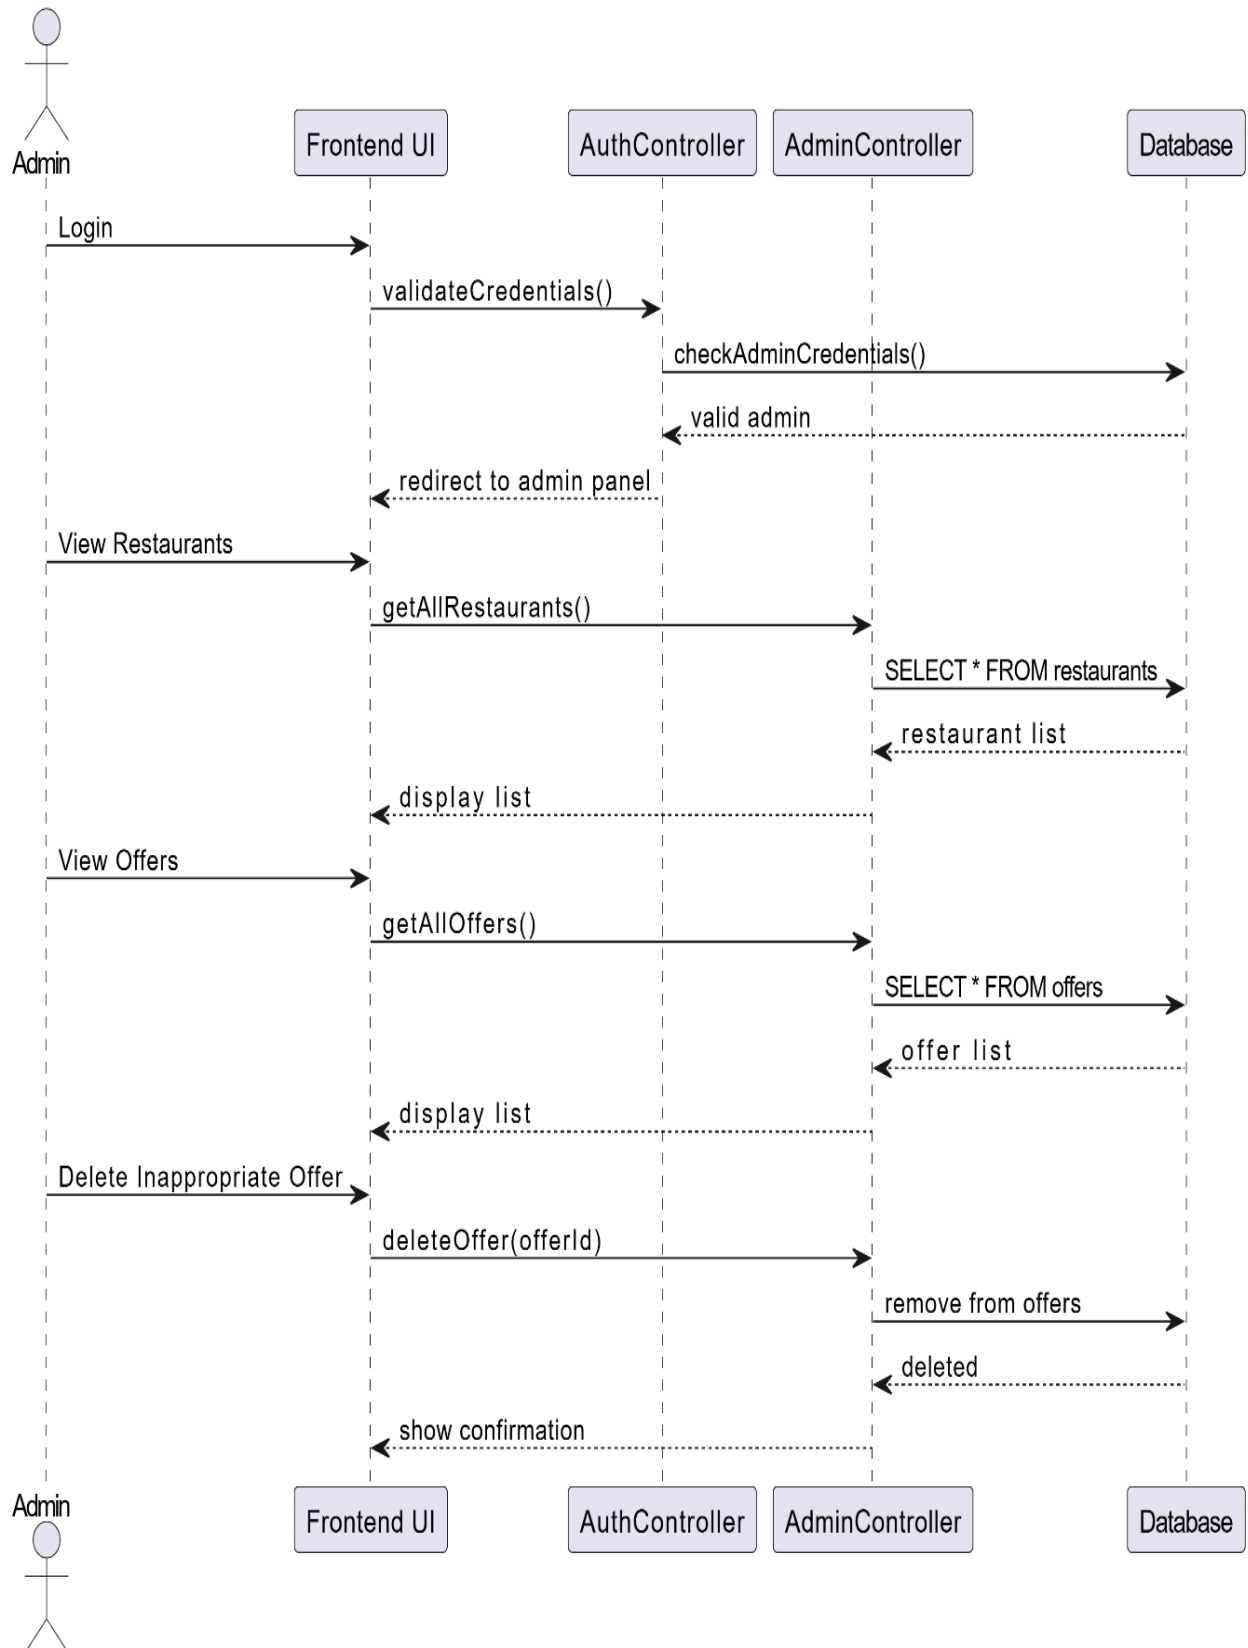

3.3. INTERACTION DIAGRAM

The interaction diagram shows the sequence of actions between users and the system for key functionalities such as offer creation, login, searching.

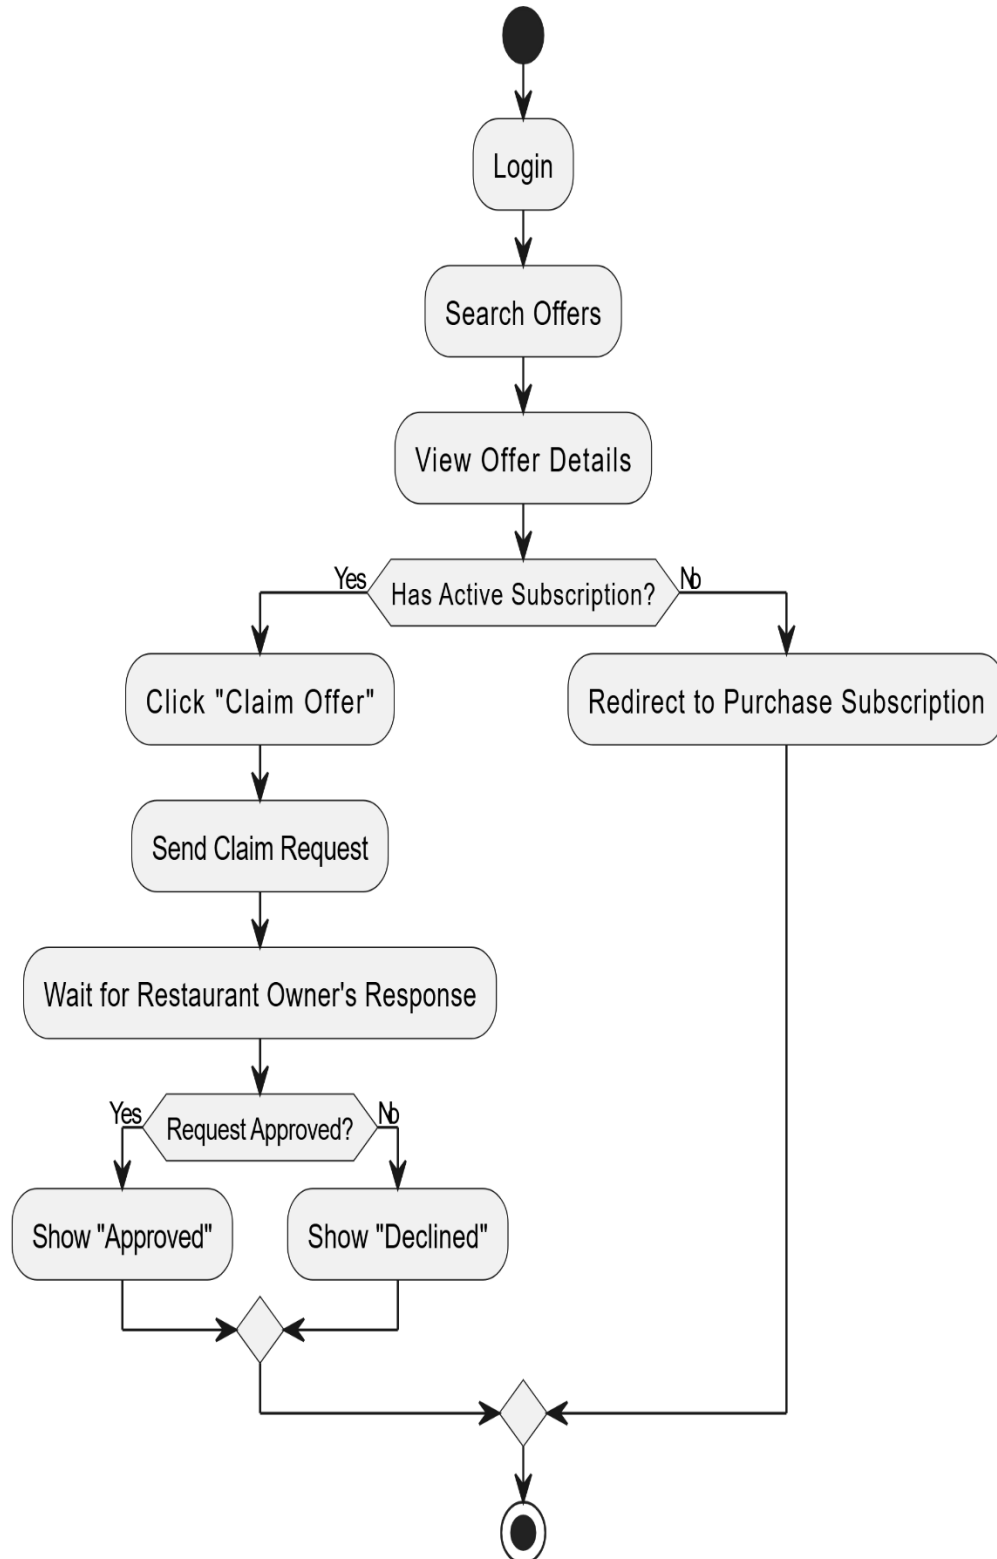

Admin - Manage Restaurants & Offers

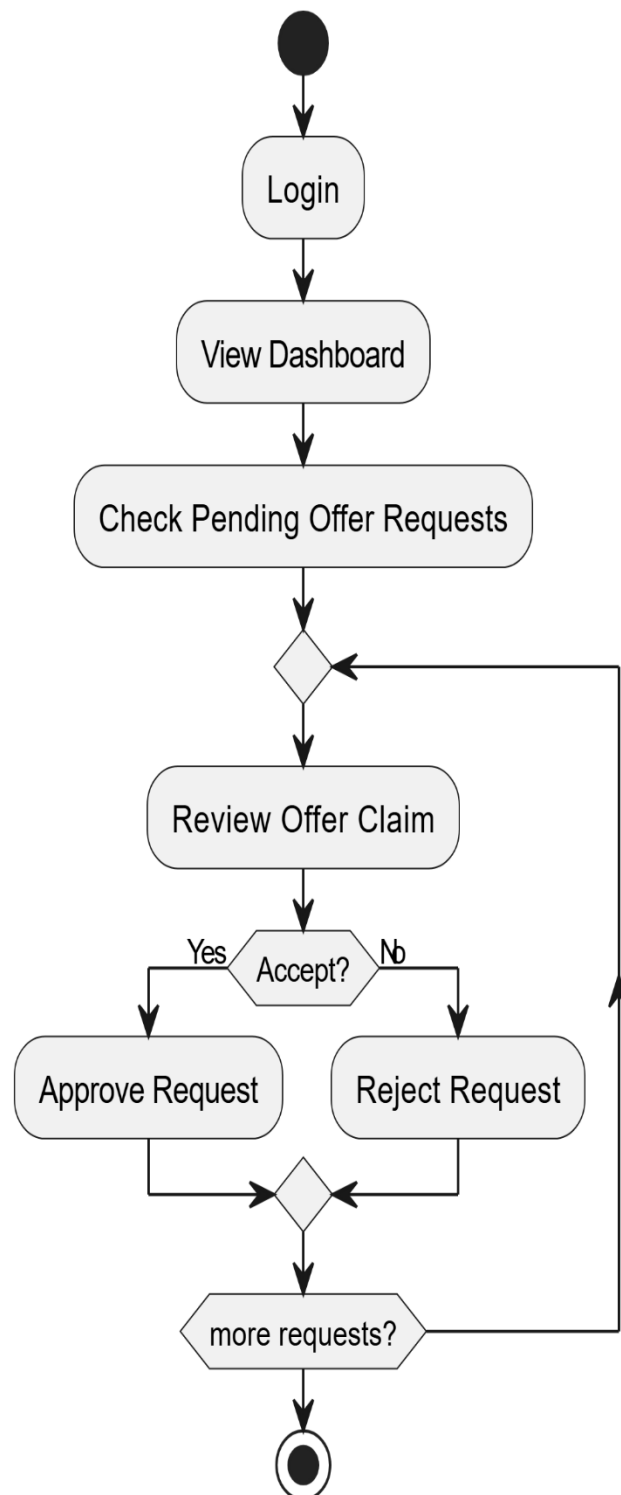

3.4. ACTIVITY DIAGRAM

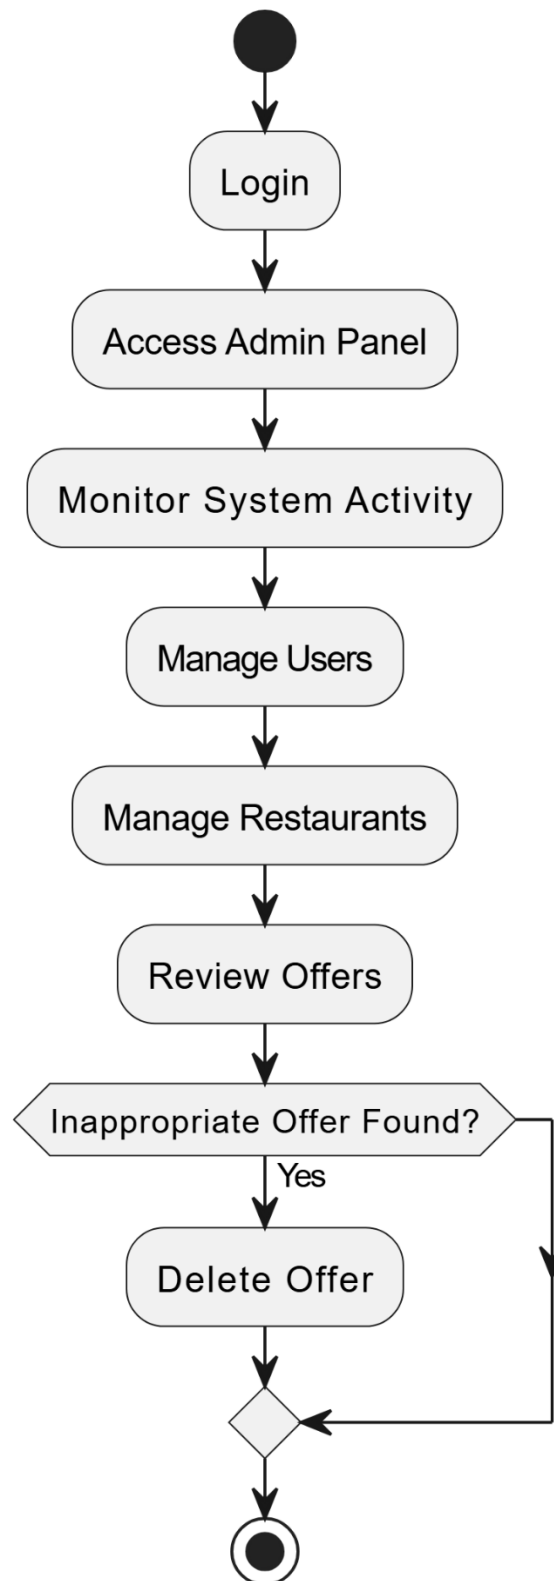

The activity diagram visualizes the workflow for major processes, including user registration, offer posting, review moderation, and admin actions.

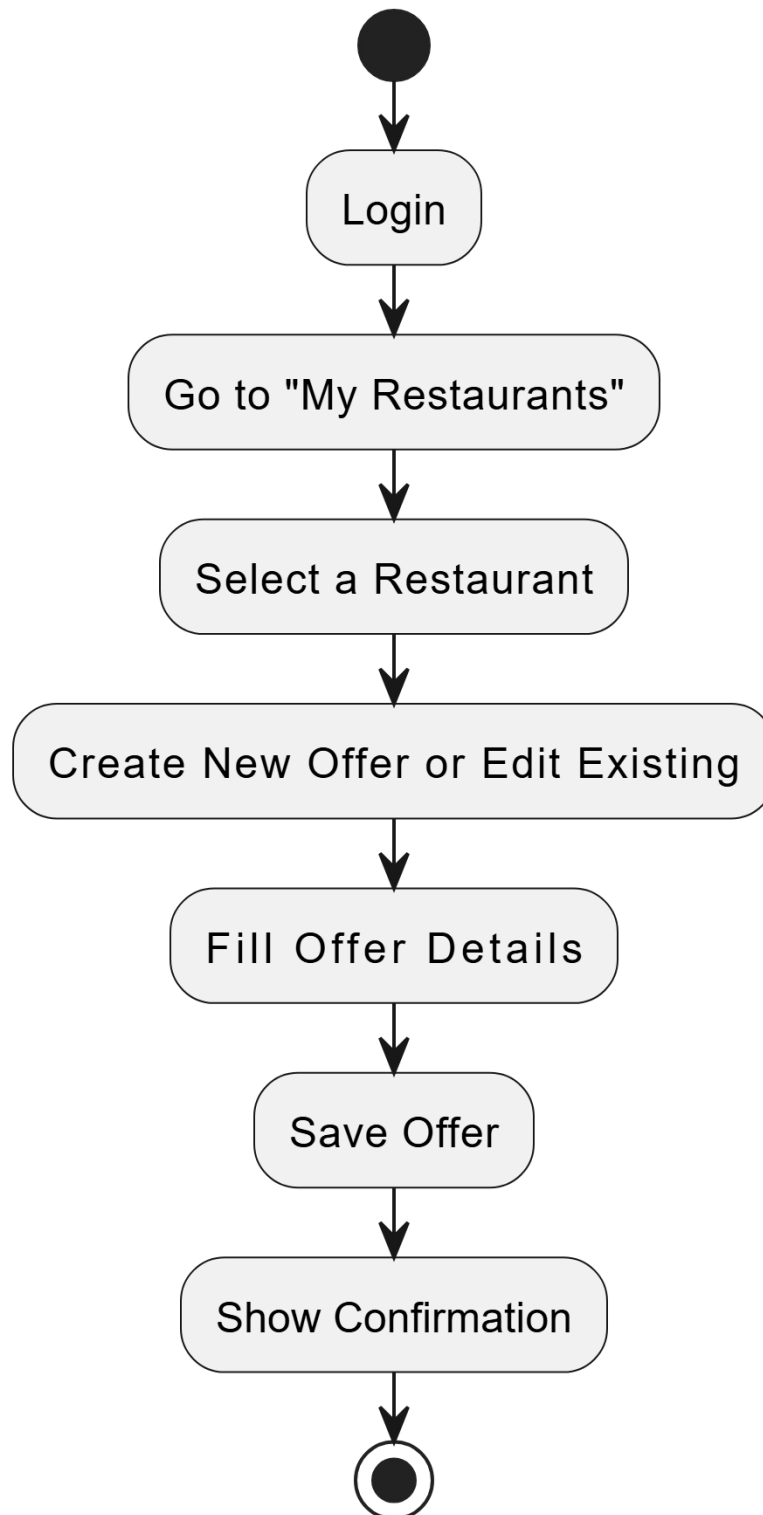

Restaurant Owner - Handle Offer Requests

Admin - Manage System Content

Restaurant Owner - Create or Edit Offer

3.5. DATA DICTIONARY

1. Table Name: Location

Table Description: Stores restaurant/location details including address, timings, and coordinates.

Table Name	Field Name	Data Type	Constraint	Description	Sample Data
Location	id	ObjectID	Primary Key	Unique document ID	507f1f77bcf86cd799439011
Location	title	String	Required	Name of the location	Café Delight
Location	category	String	Required	Category (e.g. Restaurant,café)	Restaurant
Location	description	String	Required	Detailed description	Cozy café with outdoor seating
Location	timings	String	Required	Operating hours	9:00 AM - 10:00 PM
Location	active	Boolean	Default: true	Whether the location is active	TRUE
Location	contactNumber	String	Required	Contact number	1234567890
Location	address	String	Required	Physical address	123 Main St
Location	stateId	ObjectID	Foreign Key (State)	Reference to State	507f1f77bcf86cd799439012
Location	cityId	ObjectID	Required	Foreign Key (City)	507f1f77bcf86cd799439013
Location	areaId	ObjectID	Required	Foreign Key (Area)	507f1f77bcf86cd799439014
Location	foodTypeId	ObjectID	Required	Foreign Key (FoodType)	507f1f77bcf86cd799439015
Location	latitude	Number	Required	Geographic latitude	40.7128
Location	longitude	Number	Required	Geographic longitude	-74.006
Location	imageUrl	String	Required	URL of location image	https://example.com/image.jpg
Location	userId	ObjectID	Foreign Key (users)	User who added the location	507f1f77bcf86cd799439016

2. Table Name: Offer**Table Description:** Stores promotional offers for restaurants.

Table Name	Field Name	Data Type	Constraint	Description	Sample Data
Offer	id	ObjectID	Primary Key	Unique offer ID	507f1f77bcf86cd799439021
Offer	title	String		Offer title	Summer Discount
Offer	description	String		Offer details	20% off on all items
Offer	offer_type	String		Type of offer (e.g. Discount, Combo)	Discount
Offer	discount_value	Number		Discount percentage/amount	20
Offer	restaurant_ids	Array[ObjectID]	Foreign Key (Location)	Applicable restaurants	[507f1f77bcf86cd799439011]
Offer	valid_from	Date		Offer start date	01-07-2023
Offer	valid_to	Date		Offer end date	31-07-2023
Offer	requires_approval	Boolean		Needs admin approval	FALSE
Offer	min_order_value	Number		Minimum order to redeem	100
Offer	max_redemptions	Number		Max times offer can be used	50
Offer	imageURL	String	Required	Offer image URL	https://example.com/offer.jpg
Offer	status	String	Enum: Active/Inactive	Current status	Active
Offer	payment_required	Boolean	Default: false	Whether payment is needed	FALSE

3. Table: RedeemOffer

Description: Tracks user redemptions of offers.

Table Name	Field Name	Data Type	Constraint	Description	Sample Data
RedeemOffer	_id	ObjectID	Primary Key	Unique redemption ID	507f1f77bcf86cd799439031
RedeemOffer	user_id	ObjectID	Required	Foreign Key (User)	User who redeemed
RedeemOffer	offer_id	ObjectID	Required	Foreign Key (Offer)	Redeemed offer ID
RedeemOffer	restaurant_id	ObjectID	Required	Foreign Key (Location)	Restaurant where redeemed
RedeemOffer	owner_id	ObjectID	Required	Foreign Key (User)	Restaurant owner
RedeemOffer	status	String	Enum: Pending/Approved/Rejected	Redemption status	Pending
RedeemOffer	redeemTime	Date		Time of redemption	2023-07-15T14:30:00Z

4. Table: users

Description: Stores user account details.

Table Name	Field Name	Data Type	Constraint	Description	Sample Data
users	_id	ObjectID	Primary Key	Unique user ID	507f1f77bcf86cd799439016
users	firstName	String	Required	User's first name	John
users	lastName	String	Required	User's last name	Doe
users	name	String		Auto-generated full name	John Doe
users	age	Number		User's age	30
users	status	Boolean	Default: true	Account status	TRUE
users	roleId	ObjectID	Foreign Key (roles)	User's role	507f1f77bcf86cd799439041
users	email	String	Unique + Required	User email	john@example.com
users	password	String	Required	Encrypted password	hashed_123

4. DEVELOPMENT

Pocket Buddy was developed using the MVC architecture for better organization and easy maintenance. The frontend was built with React and Vite, while the backend used Node.js, Express, and MongoDB. Team members focused on their areas of expertise, working on the frontend and backend separately. Git was used for version control, and we had regular code reviews and meetings to ensure smooth collaboration. Each feature was tested individually before being added to the full system.

4.1. CODING STANDARDS

✓ Naming Conventions

- **Components & Models:** PascalCase (e.g., UserCard.jsx, OfferModel.js)
- **Variables & Functions:** camelCase (e.g., handleClick, userData)
- **Database:** camelCase (e.g., offerDetails, userSubscriptions)

✓ Code Structure

- 4-space indentation
- Braces on the same line
- One blank line between functions

✓ Comments

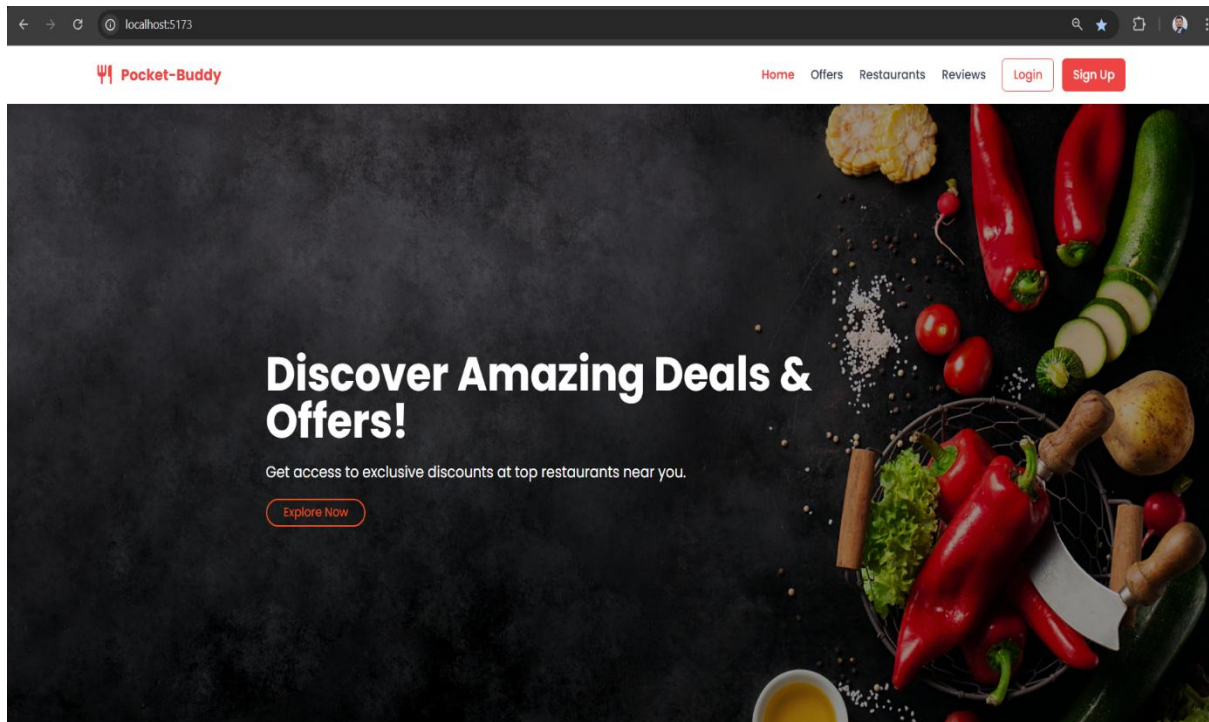

- Single-line comments for clarity
- Multi-line comments for complex logic
- Functions and components include brief documentation

✓ Tools

- **Prettier** tools were used for consistent formatting.

Restaurants Manage Offer Requests

The screenshot shows the 'Manage Offer Requests' interface. The sidebar on the left includes a user profile for 'mac donald's' and navigation options: Dashboard, Offer Requests (highlighted), Add Restaurant, My Restaurants, My Offers, and Add Offer. The main content area is titled 'Manage Offer Requests' and features a search bar and filter buttons for 'Pending', 'Approved', and 'Rejected'. Below this, there are three pending offer request cards:

- Bhoomii Chauhan** (bhoomiichauhan@yopmail.com): McNuggets Mania - Flat 20% Off. Requested on 11 Apr, 17:04.
- viren Chauhan** (virencchauhan@yopmail.com): Big Mac Combo - ₹75 Off. Requested on 10 Apr, 14:28.
- Juliee Chauhan** (juleechauhan@yopmail.com): McSaver Meal - Flat ₹50 Off. Requested on 10 Apr, 14:16.

Each card has 'Approve' and 'Reject' buttons. A fourth card for 'viren Chauhan' is partially visible at the bottom.

Add Restaurants

The screenshot shows the 'Add Restaurant' form. The sidebar on the left is the same as in the previous screenshot, with 'Add Restaurant' highlighted. The form fields are as follows:

- Restaurant Name***: Text input field.
- Category***: Text input field.
- Description***: Text area with a clear button.
- Timings***: Text input field with a placeholder 'e.g. 10:00 AM - 10:00 PM'.
- Contact Number***: Text input field.
- Address***: Text area with a clear button.
- Latitude***: Text input field.
- Longitude***: Text input field.
- State***: Dropdown menu with 'SELECT STATE'.
- City***: Dropdown menu with 'SELECT CITY'.
- Area***: Dropdown menu with 'SELECT AREA'.
- Food Type***: Dropdown menu with 'SELECT FOOD TYPE'.
- Restaurant Image***: File upload area with a 'Choose File' button and 'No file chosen' text.

A large blue button labeled 'Add Restaurant' is at the bottom of the form.

5. AGILE DOCUMENTATION

5.1. AGILE PROJECT CHARTER

General Project Information	
Project Name	Pocket Buddy
Project Champion	Tushar Chauhan - Bhoomi Chavada
Project Sponsor	Tushar Chauhan - Bhoomi Chavada
Project Manager	Parth joshi
Stakeholders	Grownited Private Limited
Expected Start Date	January 1, 2026
Expected Completion Date	April 15, 2026

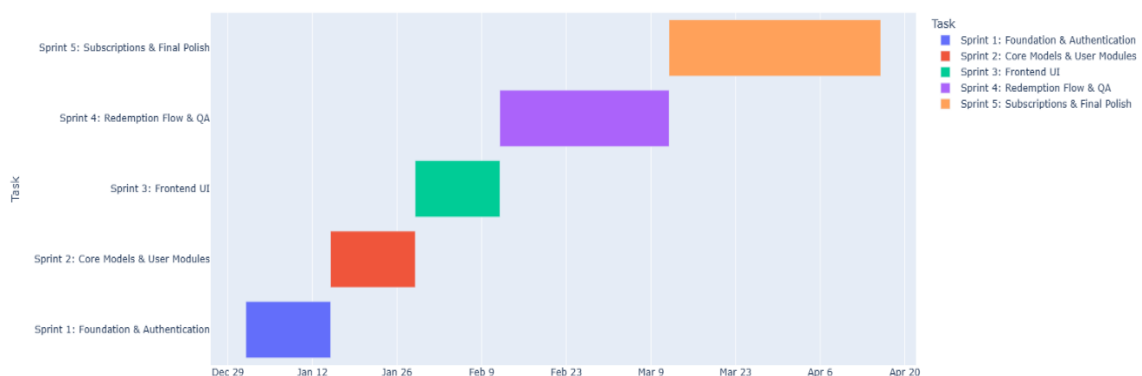

Project Details	
Mission	We continuously innovate to be the best offers and deals platform for our users, making dining out and saving money easier and more rewarding.
Vision	Pocket Buddy is a digital platform that helps people find and use restaurant deals easily. It connects users with restaurant owners, making it simple to browse, claim, and enjoy food offers—just like how online shopping made buying things easier. Whether it's a local café or a big chain, Pocket Buddy brings tasty deals straight to your screen
Scope	The admin has complete control over the platform, managing user accounts, restaurant owners, and analyzing user activity. They can offer personalized discounts based on user preferences. The system can grow in the future, allowing new types of offers and partnerships with platforms like Zomato or Swiggy. Pocket Buddy also helps restaurant owners promote their businesses online in a trusted environment

5.2. AGILE ROAD MAP

Agile Roadmap – Pocket Buddy Project (Jan–Apr 2026)

The Pocket Buddy project follows an agile roadmap structured into five major sprints from late December 2026 to mid-April 2026. Each sprint focuses on building key components of the platform in a phased and iterative manner:

1. **Sprint 1: Foundation & Authentication (Dec 29, 2026 – Jan 11, 2026)**
 - Set up the project structure and development environment.
 - Implemented user authentication, authorization, and basic roles.
2. **Sprint 2: Core Models & User Modules (Jan 12 – Jan 25, 2026)**
 - Developed essential MongoDB models and Express-based backend routes.
 - Built foundational user-related modules and logic.
3. **Sprint 3: Frontend UI (Jan 26 – Feb 8, 2026)**
 - Created core frontend components using React and Vite.
 - Integrated backend APIs with dynamic user interfaces.
4. **Sprint 4: Redemption Flow & QA (Feb 10 – Mar 12, 2026)**
 - Designed and implemented the offer redemption request and approval system.
 - Conducted thorough testing and bug fixing for major flows.
5. **Sprint 5: Subscriptions & Final Polish (Mar 13 – Apr 15, 2026)**
 - Integrated subscription-based access with Razorpay for payments.
 - Finalized features, improved UI/UX, and completed project polish.

5.3. AGILE PROJECT PLAN

Sprint	Task Name	Duration	Start	Finish	Status
Sprint #1	Foundation Setup	11d	01-01-2026	11-01-2026	Completed
Sprint#1 : Foundation Setup	Sprint Planning	2d	01-01-2026	02-01-2026	Completed
Sprint#1 : Foundation Setup	Project Boilerplate Setup	3d	03-01-2026	05-01-2026	Completed
Sprint#1 : Foundation Setup	Authentication System	4d	06-01-2026	09-01-2026	Completed
Sprint#1 : Foundation Setup	Role-based Access Control	2d	10-01-2026	11-01-2026	Completed
Sprint #2	Core Modules	13d	15-01-2026	27-01-2026	Completed
Sprint#2 : Core Modules	User & Restaurant Modules (CRUD)	5d	15-01-2026	19-01-2026	Completed
Sprint#2 : Core Modules	Offer Model CRUD	5d	20-01-2026	24-01-2026	Completed
Sprint#2 : Core Modules	Link Offers to Restaurants	3d	25-01-2026	27-01-2026	Completed
Sprint #3	UI & Dashboard	13d	29-01-2026	10-02-2026	Completed
Sprint#3 : UI & Dashboard	User Dashboard	5d	29-01-2026	02-02-2026	Completed
Sprint#3 : UI & Dashboard	Offer Form for Restaurants	3d	03-02-2026	05-02-2026	Completed
Sprint#3 : UI & Dashboard	Restaurant Dashboard UI Enhancements	5d	06-02-2026	10-02-2026	Completed
Sprint #4	Search & Redemption	24d	12-02-2026	07-03-2026	Completed
Sprint#4 : Search & Redemption	Enhance Filters/Search	5d	12-02-2026	16-02-2026	Completed
Sprint#4 : Search & Redemption	QA & Performance Testing	5d	17-02-2026	21-02-2026	Completed
Sprint#4 : Search & Redemption	Offer Redemption Flow	7d	22-02-2026	28-02-2026	Completed
Sprint#4 : Search & Redemption	Redemption Approval Dashboard	7d	01-03-2026	07-03-2026	Completed
Sprint #5	Subscription & Final Touches	25d	12-03-2026	05-04-2026	Completed
Sprint#5 : Subscription & Final Touches	Razorpay Integration	5d	12-03-2026	16-03-2026	Completed
Sprint#5 : Subscription & Final Touches	Subscription Backend Logic	5d	17-03-2026	21-03-2026	Completed
Sprint#5 : Subscription & Final Touches	Restrict non-subscribers	5d	22-03-2026	26-03-2026	Completed
Sprint#5 : Subscription & Final Touches	Final UI/UX Polish & SEO	5d	27-03-2026	31-03-2026	Completed
Sprint#5 : Subscription & Final Touches	Testing and Docs	5d	01-04-2026	05-04-2026	Completed

5.4. AGILE USER STORY

User Story ID	As a (type of user)	I want to (perform some task)	So that I can (achieve some goal)
1	Admin	Manage Login Module	Ensure that only validated users can access the platform
2	Admin	Manage Users and Restaurant Owners	Monitor and control platform access
3	Admin	View and Manage Subscriptions	Track who has active plans and manage billing status
4	Restaurant Owner	Manage Offers (Insert, Update, Delete, View)	Control and update promotions for their restaurants
5	Restaurant Owner	View and Approve/Decline Redemption Requests	Control how and when offers are redeemed
6	Restaurant Owner	Track Offer Redemptions and Customer Interactions	Understand offer performance and improve engagement
7	Customer	View and Filter Restaurant Offers	Easily find the best deals nearby
8	Customer	Redeem Offers with Restaurant Approval	Ensure fair use and transparency of the offers
9	Customer	Subscribe to a Plan and Unlock Offers	Gain access to exclusive deals and benefits

5.5. AGILE RELEASE PLAN

Sprint	Task Name	Duration	Start	Finish	Status
Sprint #1	Foundation Setup	11d	01-01-2026	11-01-2026	Completed
Sprint#1 : Foundation Setup	Sprint Planning	2d	01-01-2026	02-01-2026	Completed
Sprint#1 : Foundation Setup	Project Boilerplate Setup	3d	03-01-2026	05-01-2026	Completed
Sprint#1 : Foundation Setup	Authentication System	4d	06-01-2026	09-01-2026	Completed
Sprint#1 : Foundation Setup	Role-based Access Control	2d	10-01-2026	11-01-2026	Completed
Sprint #2	Core Modules	13d	15-01-2026	27-01-2026	Completed
Sprint#2 : Core Modules	User & Restaurant Modules (CRUD)	5d	15-01-2026	19-01-2026	Completed
Sprint#2 : Core Modules	Offer Model CRUD	5d	20-01-2026	24-01-2026	Completed
Sprint#2 : Core Modules	Link Offers to Restaurants	3d	25-01-2026	27-01-2026	Completed

Sprint #3	UI & Dashboard	13d	29-01-2026	10-02-2026	Completed
Sprint#3 : UI & Dashboard	User Dashboard	5d	29-01-2026	02-02-2026	Completed
Sprint#3 : UI & Dashboard	Offer Form for Restaurants	3d	03-02-2026	05-02-2026	Completed
Sprint#3 : UI & Dashboard	Restaurant Dashboard UI Enhancements	5d	06-02-2026	10-02-2026	Completed
Sprint #4	Search & Redemption	24d	12-02-2026	07-03-2026	Completed
Sprint#4 : Search & Redemption	Enhance Filters/Search	5d	12-02-2026	16-02-2026	Completed
Sprint#4 : Search & Redemption	QA & Performance Testing	5d	17-02-2026	21-02-2026	Completed
Sprint#4 : Search & Redemption	Offer Redemption Flow	7d	22-02-2026	28-02-2026	Completed
Sprint#4 : Search & Redemption	Redemption Approval Dashboard	7d	01-03-2026	07-03-2026	Completed
Sprint #5	Subscription & Final Touches	25d	12-03-2026	05-04-2026	Completed
Sprint#5 : Subscription & Final Touches	Razorpay Integration	5d	12-03-2026	16-03-2026	Completed
Sprint#5 : Subscription & Final Touches	Subscription Backend Logic	5d	17-03-2026	21-03-2026	Completed
Sprint#5 : Subscription & Final Touches	Restrict non-subscribers	5d	22-03-2026	26-03-2026	Completed
Sprint#5 : Subscription & Final Touches	Final UI/UX Polish & SEO	5d	27-03-2026	31-03-2026	Completed
Sprint#5 : Subscription & Final Touches	Testing and Docs	5d	01-04-2026	05-04-2026	Completed

5.6. AGILE SPRINT BACKLOG

Task Name	Story	Sprint Ready	Priority	Status	Story Point
Sprint#1: Project Setup & Authentication	Yes	Yes	High	Completed	10
→ UI Designing (Login & Role UI)	Yes	Yes	High	Completed	5
→ Setup Project Structure (Frontend + Backend)	Yes	Yes	High	Completed	5
→ Implement Auth (JWT, Roles)	Yes	Yes	High	Completed	8
Sprint#2: Core Modules & Offers	Yes	Yes	High	Completed	10
→ User & Restaurant Owner Module	Yes	Yes	High	Completed	6
→ Offer Model + CRUD	Yes	Yes	High	Completed	6
→ Link Offers to Restaurant	Yes	Yes	Medium	Completed	4
Sprint#3: UI Improvements & Add Offer Form	Yes	Yes	High	Completed	8
→ User Dashboard UI (Hero, Filters)	Yes	Yes	Medium	Completed	5
→ Restaurant Add Offer Form	Yes	Yes	High	Completed	5
→ Restaurant UI Enhancement	Yes	Yes	Medium	Completed	4
Sprint#4: Search, Redemption & QA	Yes	Yes	High	Completed	10
→ Search Filter Improvements	Yes	Yes	Medium	Completed	4
→ Redemption Flow (User Side)	Yes	Yes	High	Completed	6
→ Redemption Approval by Owner	Yes	Yes	High	Completed	5
→ Initial Testing & Debugging	Yes	Yes	Medium	Completed	3
Sprint#5: Subscription, Polish	Yes	Yes	High	Completed	10
→ Razorpay Integration (Frontend)	Yes	Yes	High	Completed	4
→ Backend Subscription + Admin View	Yes	Yes	High	Completed	5
→ Restrict Offer Claims	Yes	Yes	Medium	Completed	3
→ Final UI Polish + SEO	Yes	Yes	Medium	Completed	3
→ Final Testing, Docs	Yes	Yes	High	Completed	3

5.7. AGILE TEST PLAN

Project Name: Pocket Buddy

Technology Stack: MERN (MongoDB, Express.js, React.js, Node.js)

Testing Device: HP Intel Core i3 (7th Gen) / Modern Browsers (Chrome, Microsoft edge)

Test Case 1: User Authentication

Module: Login & Role Management

Priority: High

Tested By: Tushar Chauhan - Bhoomi Chavada

Test Step	Action	Expected Result	Actual Result	Pass/Fail
1. Click "Login" as Admin	Enter valid admin credentials	Redirect to admin dashboard	Redirected to admin dashboard	☒ Pass
2. Enter wrong password	Submit form	Show error: "Invalid credentials"	Error message displayed correctly	☒ Pass
3. Login with empty email field	Leave email blank	Show error: "Email required"	Error message: "Email required" shown	☒ Pass
4. Login as unregistered user	Use fake credentials	Show error: "User not found"	Error message: "User not found" displayed	☒ Pass

Test Case 2: Offer Creation & Management**Module:** Restaurant Owner Dashboard**Priority:** High**Tested By:** Tushar Chauhan - Bhoomi Chavada

Test Step	Action	Expected Result	Actual Result	Pass/Fail
1. Add new offer (valid data)	Fill all required fields	Offer appears in "Active Offers"	Offer successfully added and listed	☒ Pass
2. Add offer with missing title	Leave title blank	Show error: "Title required"	Error message displayed correctly	☒ Pass
3. Edit offer discount value	Update discount to 20%	Changes reflect in database	Discount updated and reflected in UI	☒ Pass
4. Delete expired offer	Click "Delete" on expired offer	Offer removed from list	Offer deleted and no longer visible	☒ Pass

Test Case 3: Offer Redemption Flow**Module:** User Dashboard**Priority:** Medium**Tested By:** Tushar Chauhan - Bhoomi Chavada

Test Step	Action	Expected Result	Actual Result	Pass/Fail
1. User views redeemable offers	Open "Available Offers" tab	List loads without errors	Offers loaded successfully	☒ Pass
2. Attempt redemption (no sub)	Click "Redeem" button	Show prompt: "Subscribe first"	Subscription prompt displayed	☒ Pass
3. Subscribed user redeems offer	Complete redemption steps	Status changes to "Pending"	Offer marked as pending	☒ Pass
4. Owner rejects redemption	Click "Reject" in dashboard	User notified of rejection	User received rejection notification	☒ Pass

6. PROPOSED ENHANCEMENTS

While the current system covers core features like offer management, user authentication, restaurant dashboards, and subscription payments, future enhancements can improve user experience, scalability, and system intelligence. Proposed improvements include:

- 1. AI-Powered Personalized Recommendations**
Implement machine learning algorithms to analyze user preferences and behavior to show the most relevant offers and restaurants.
- 2. Subscription Analytics for Admins**
Include dashboards for admins to analyze trends in subscriptions, user engagement, and revenue.
- 3. In-app Notifications and Alerts**
Notify users about new offers, expiring deals, and subscription reminders via real-time notifications.
- 4. Multi-language Support**
Add support for regional languages to increase accessibility and reach a broader user base.
- 5. Advanced Search and Filter Options**
Improve search by allowing users to filter based on offer type, cuisine, rating, distance, and more.
- 6. Offer Sharing and Referral System**
Allow users to share offers with friends and earn rewards, boosting engagement and organic growth.
- 7. QR Code-Based Redemption**
Integrate QR codes for faster in-store offer redemptions, reducing manual validation steps for restaurant staff.

7. CONCLUSION

- The Pocket Buddy app makes it easy for users to find and access restaurant deals. It connects customers with restaurants through a simple and easy-to-use interface, helping businesses promote their offers effectively. The subscription feature allows restaurants to earn money from loyal users by giving them exclusive access to deals.
- Using Agile development, the app can keep improving and adding new features based on what users want. It meets the current needs and can be easily updated in the future to add more features, ensuring it continues to work well for users over time.
